DAM		OHR QUESTIVA 16G		REA	.49
Complete, long sided fall heifer from a very productive Kodiak daughter with a 106.3 WWR. She is also the dam of the mature sire "Redeye" that sells in this sale. We believe this heifer is sired by Country, a powerful and heavy muscled Moler grandson from the great Pierce herd in Wisconsin. DNA results pending.				FAT	.036

Good fall heifer from a great old Kodiak daughter with a super udder and 106 WWR. These 3 fall calves didn't get any extra help along the way! DNA results indicate this heifer is sired by Country—our second high selling bull 2 years ago. He sired our top selling heifer last year!				FAT	-0.28

Another fancy fall heifer out of a good uddered Pacman daughter with a 104.7 WWR! DNA results confirm this heifer is sired by Country—a great Moler grandson who was used in our herd as a yearling and coming 2-year-old.				SC	.70

OHR ROBYN 64L 65W	MRC JOHNNY CASH 524			MILK	28
DAM	HAROLDSON'S 45H CHRISTINA 54L			M&G	55
Dam had a 108.3 WWR on her first 3 calves. This one had a dip at weaning but has come back strong. Granddam is a Dam of Distinction with a 108 WWR! DNA confirms he is not out of Redeye and was a long way over due to the AI sire Hometown. This bull is not registered so EPD's are parental estimates only. The estimates would make him a breed improver for 15 of 18 categories! He'd be in the top 10% for Milk, Scrotal, Marbling and BIL. Also he'd be in the top 20% or better for M+G, BMI and CHB.
